

【書類名】 図面

[図1] 7/1

[図2] Fig. 2

transmittance/p-polarized light component transmittance

transmittance, s-polarized light component transmittance

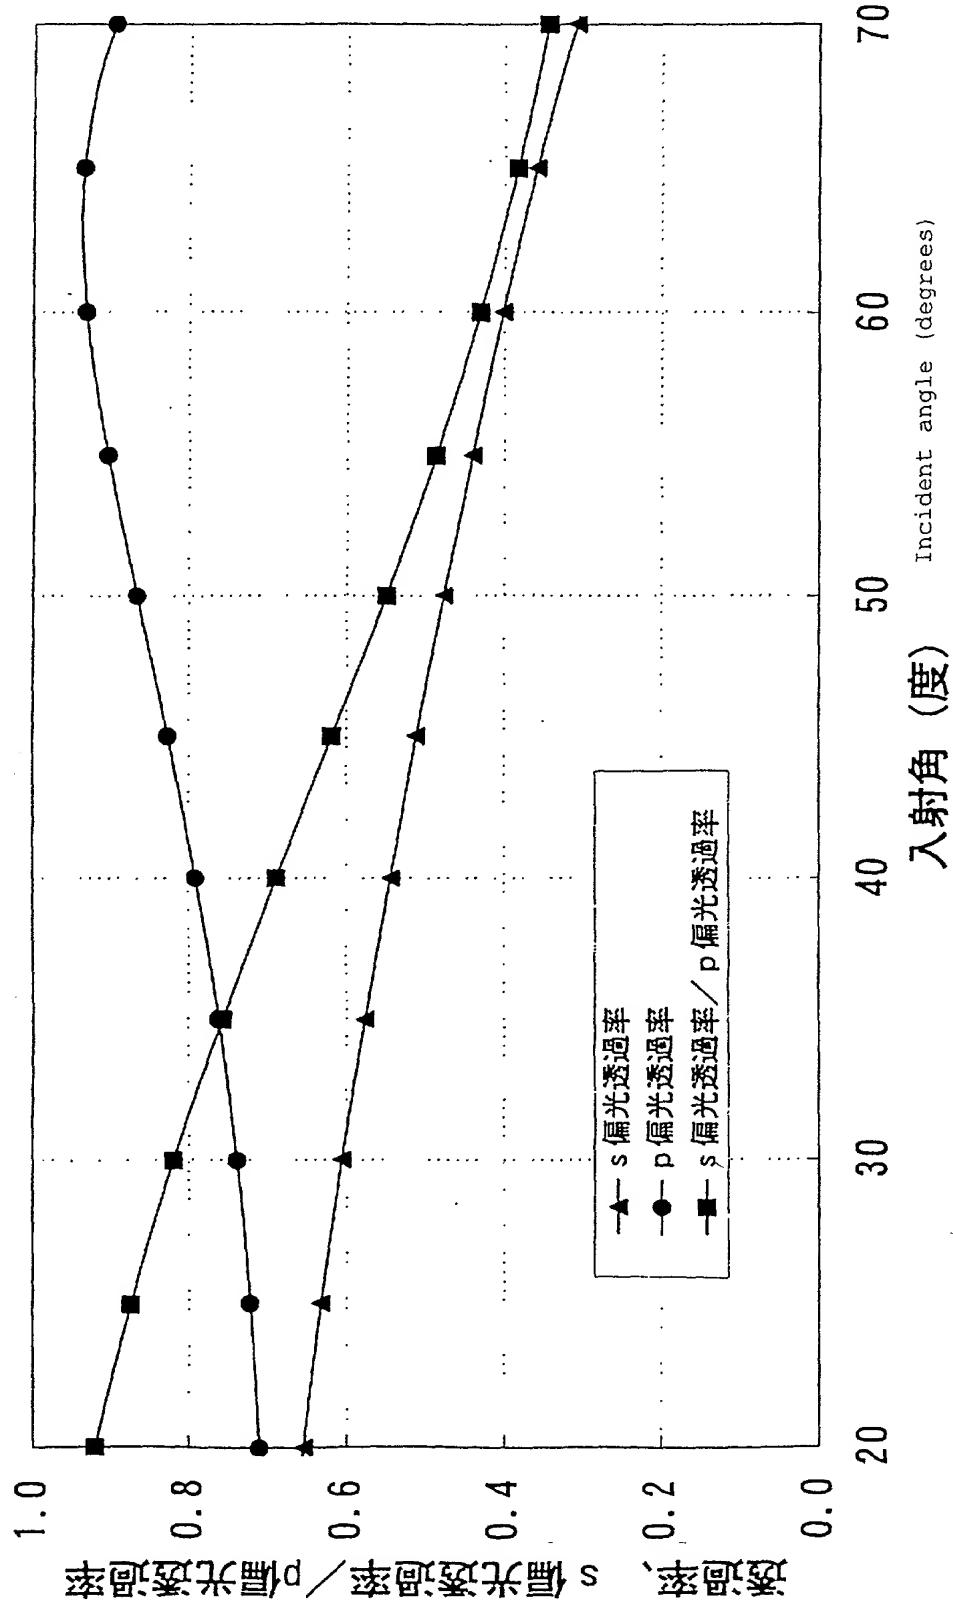

s-polarized light component transmittance

p-polarized light component transmittance

s-polarized light component transmittance/p-polarized light component transmittance

component transmittance

【図3】Fig. 3

s-polarized light component transmittance

p-polarized light component transmittance

s-polarized light component transmittance/p-polarized light component transmittance

component transmittance

[図4] Fig. 4

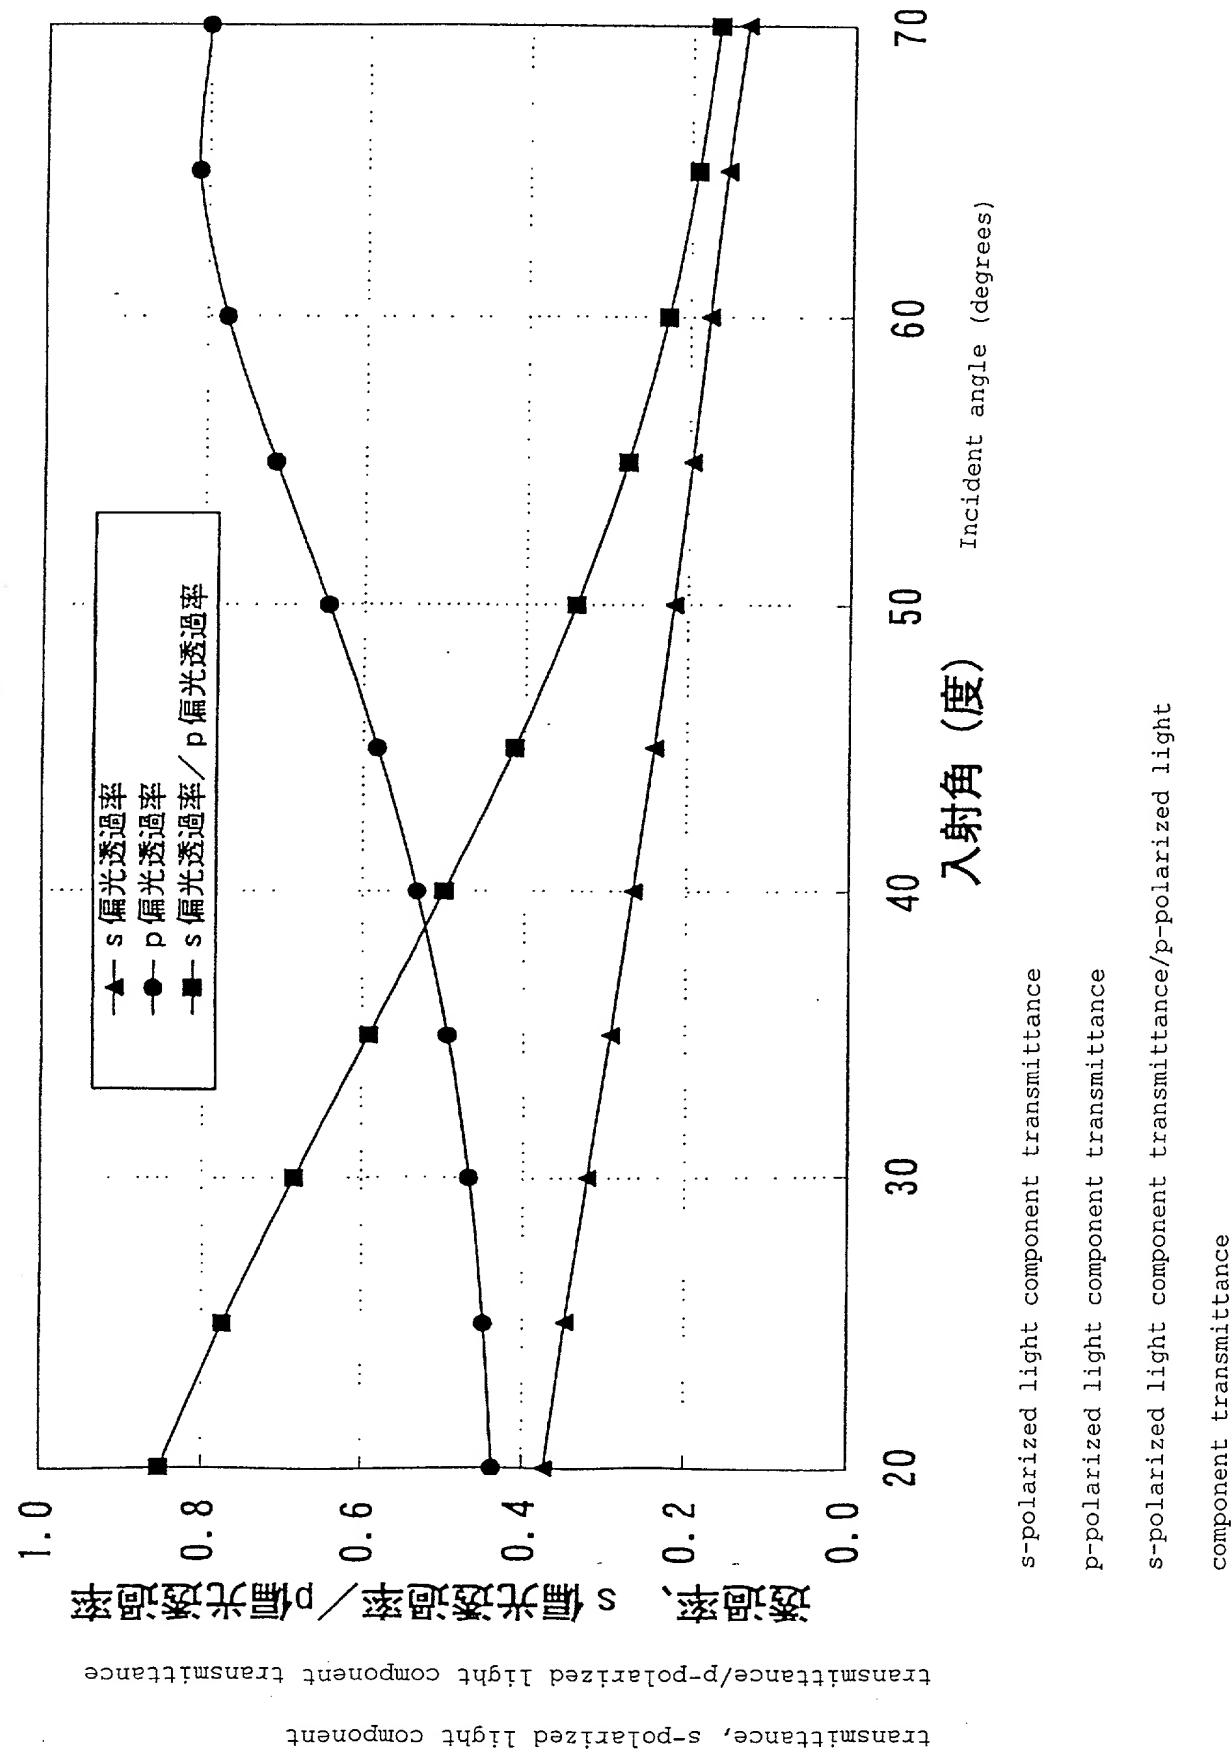

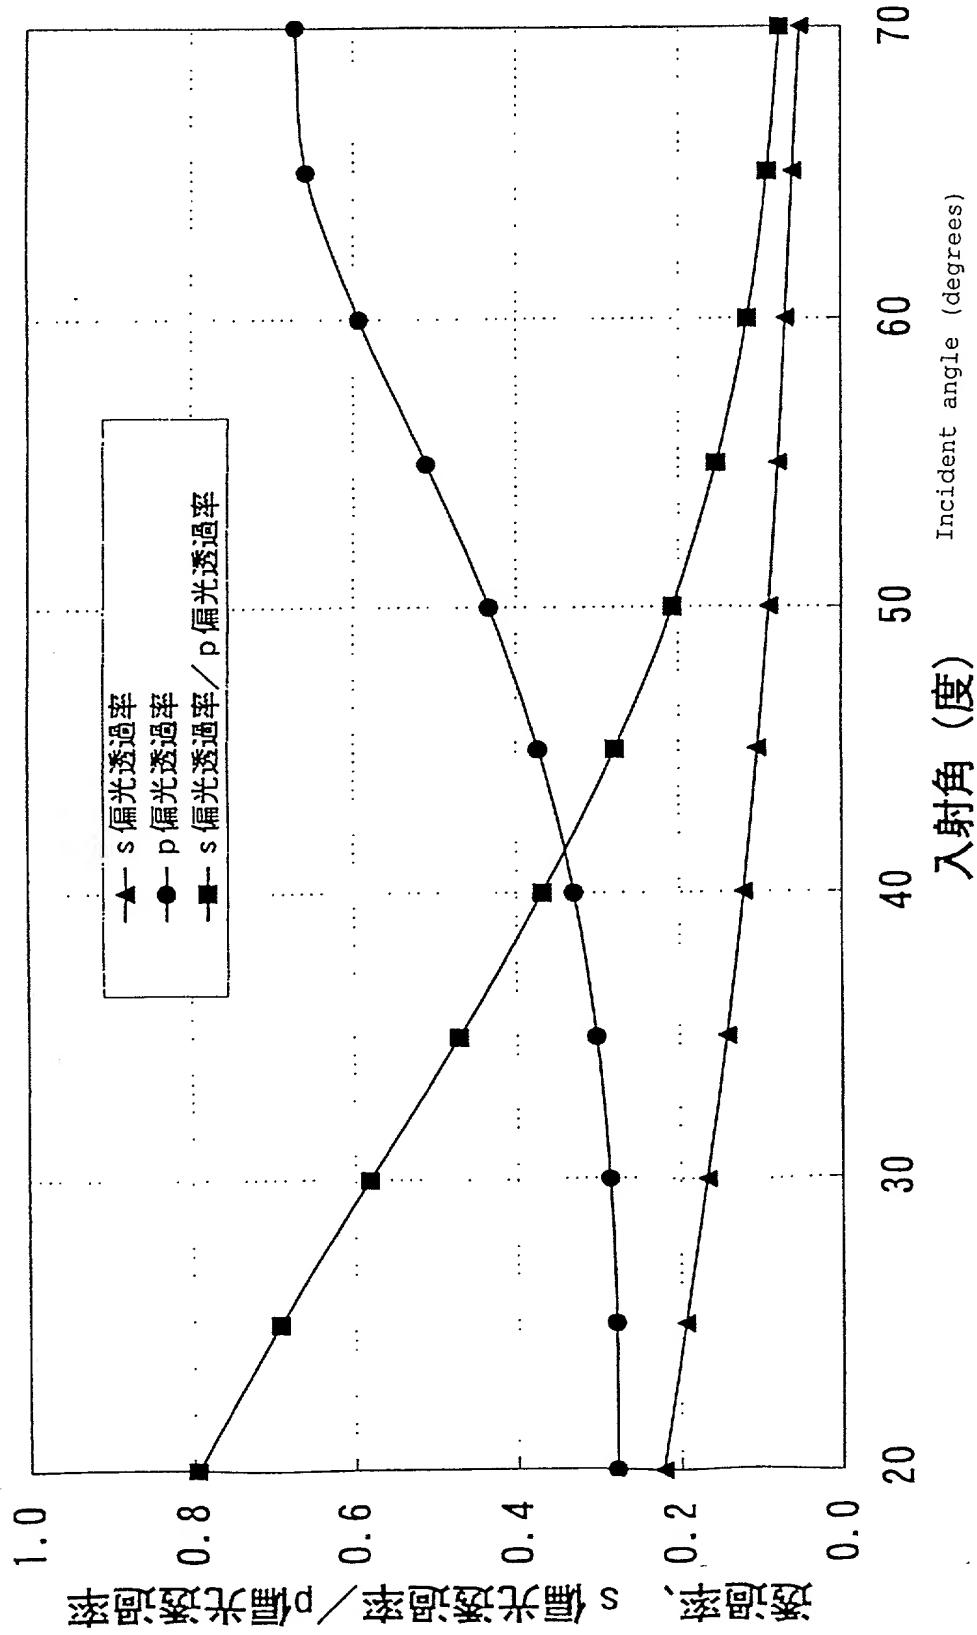

図5-7j5

s-polarized light component transmittance

p-polarized light component transmittance

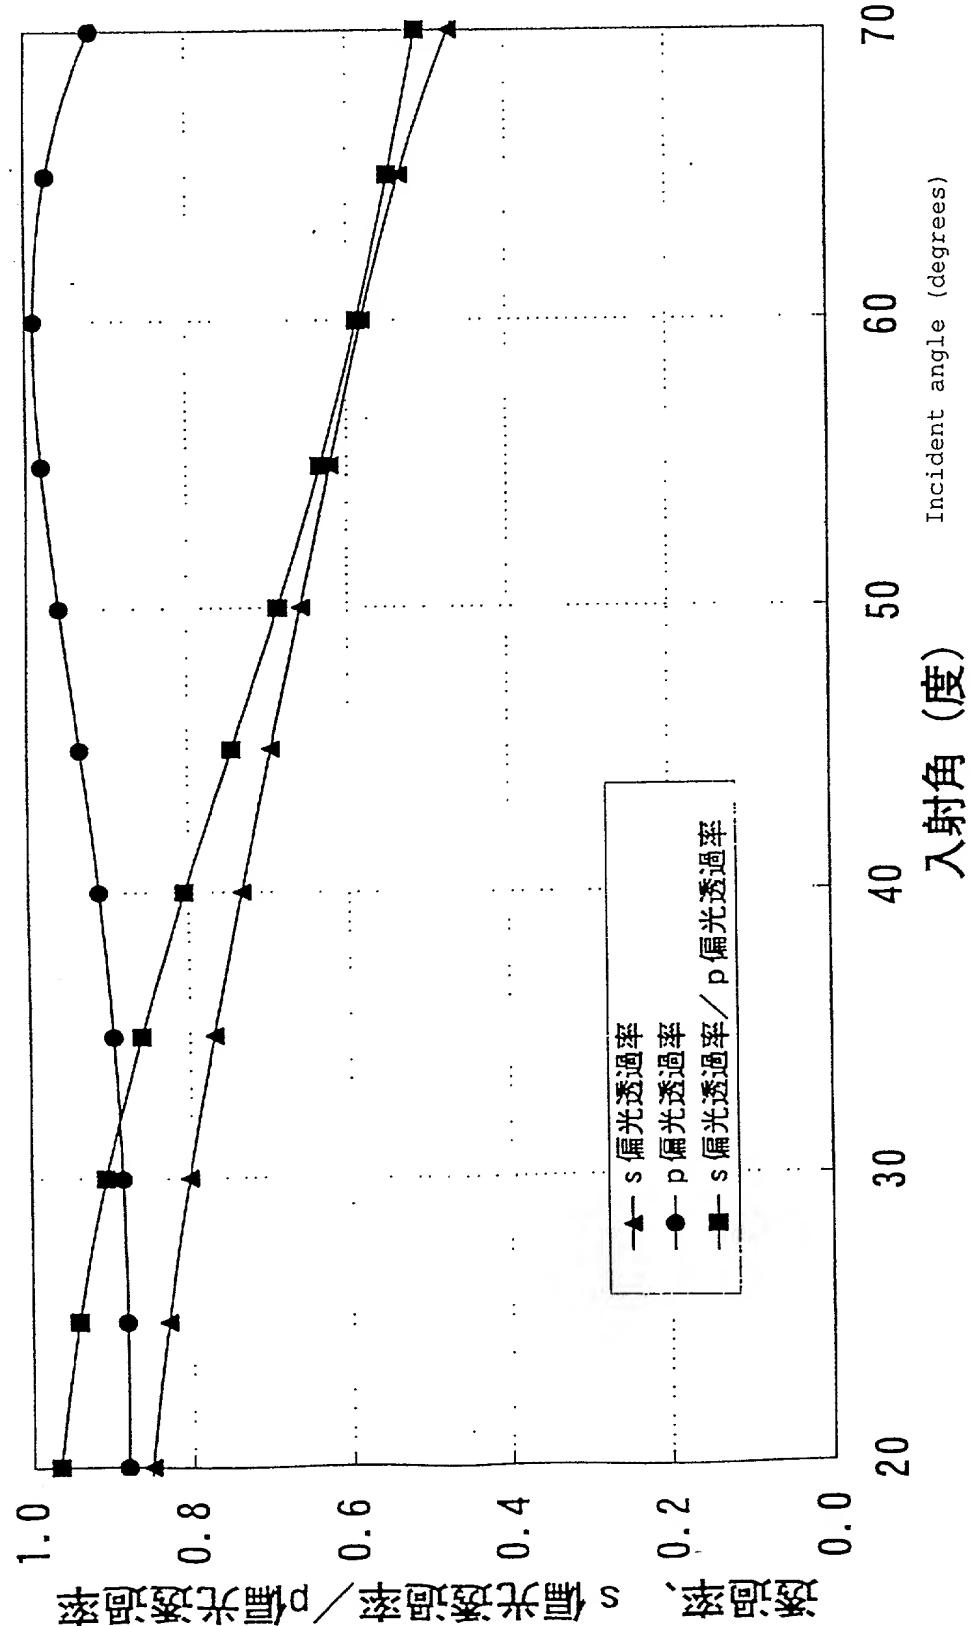

s-polarized light component transmittance/p-polarized light component transmittance

component transmittance

transmittance/p-Polarized Light component transmittance

transmittance, s-Polarized Light component transmittance

【図6】Fig. 6

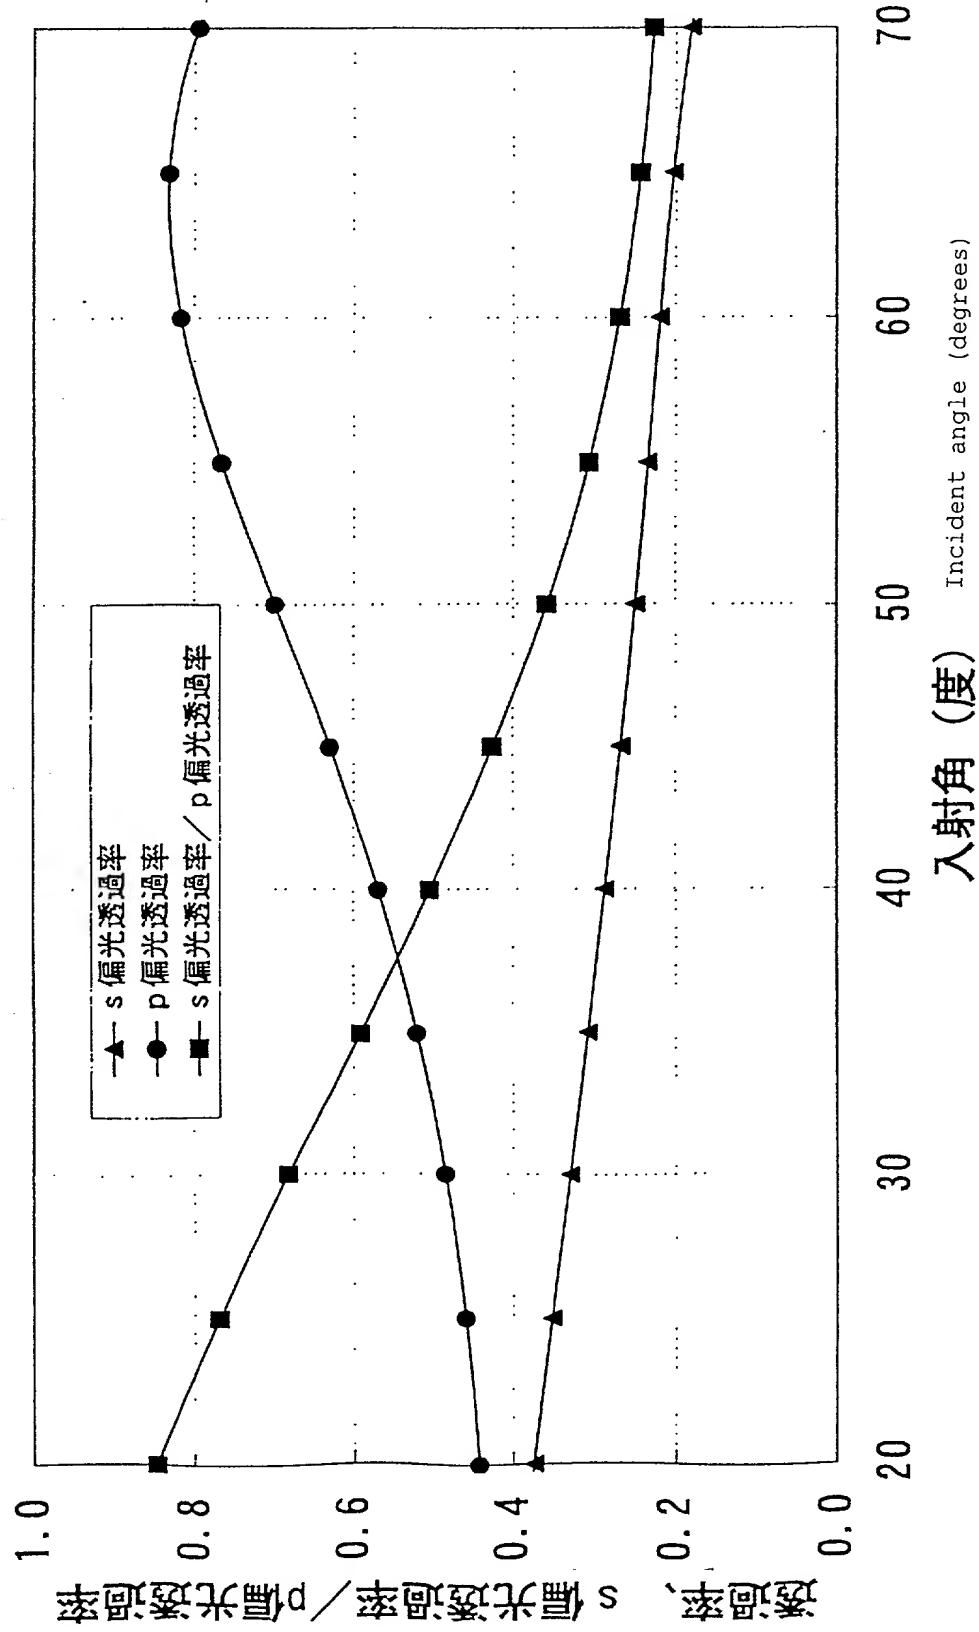

s-polarized light component transmittance

p-polarized light component transmittance

s-polarized light component transmittance/p-polarized light

component transmittance

〔図7〕

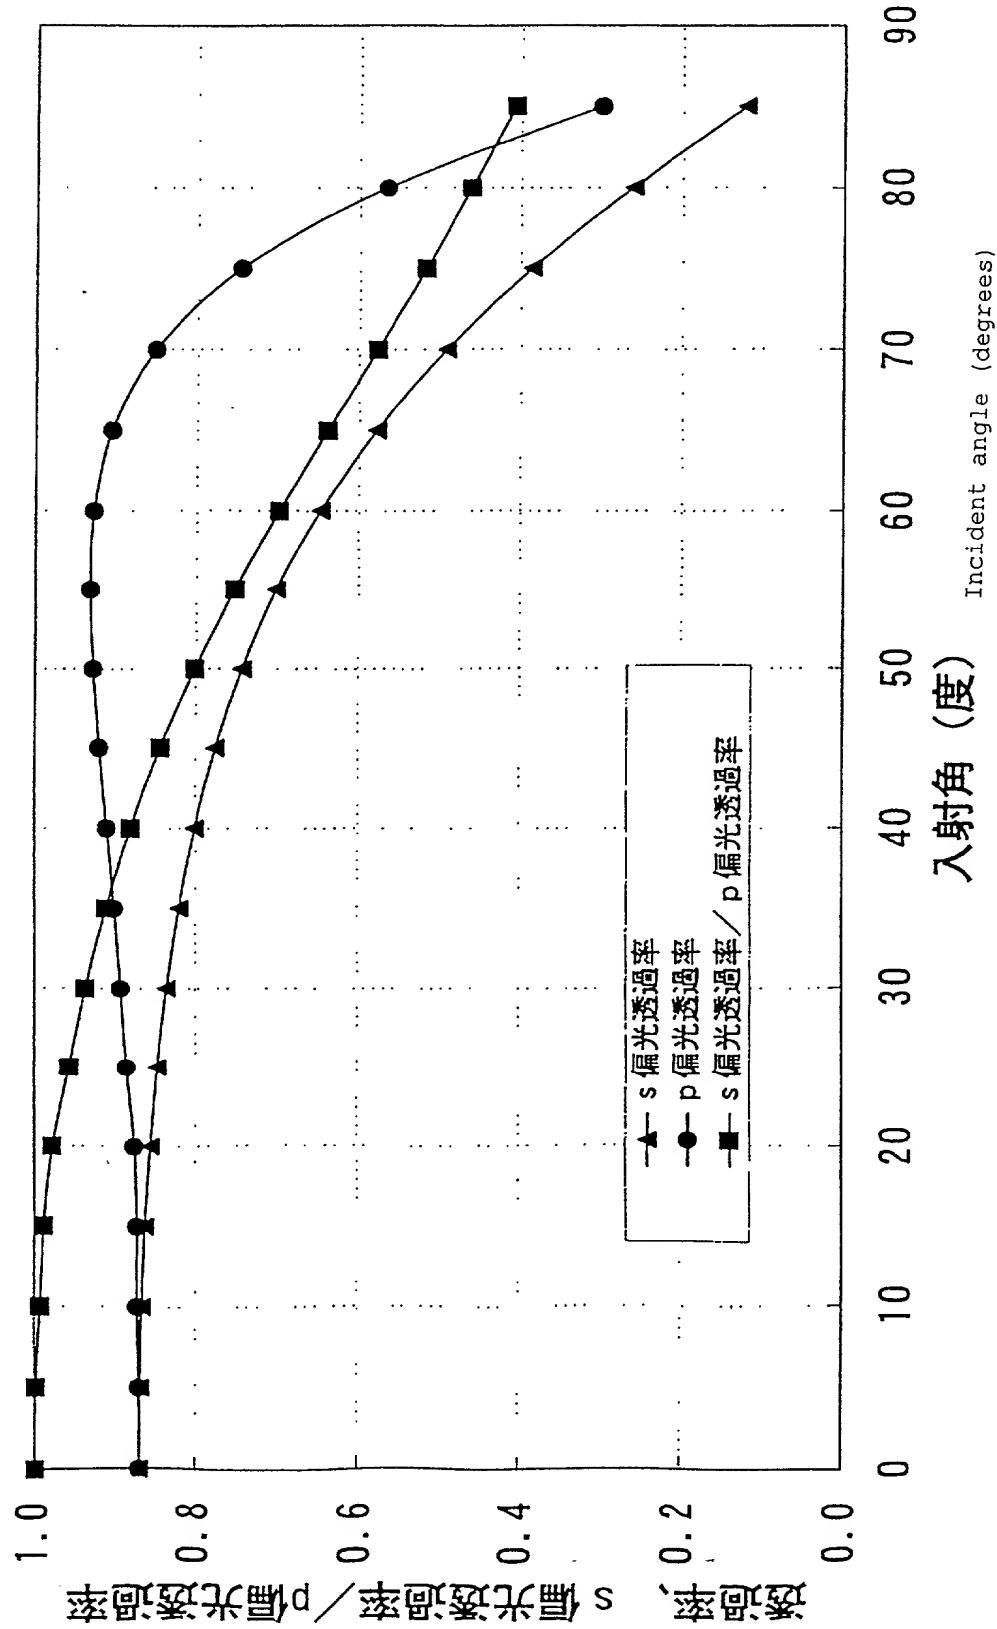

s-polarized light component transmittance

p-polarized light component transmittance

s-polarized light component transmittance/p-polarized light component transmittance

component transmittance

【図8】 7/5. 8

s-polarized light component transmittance

p-polarized light component transmittance

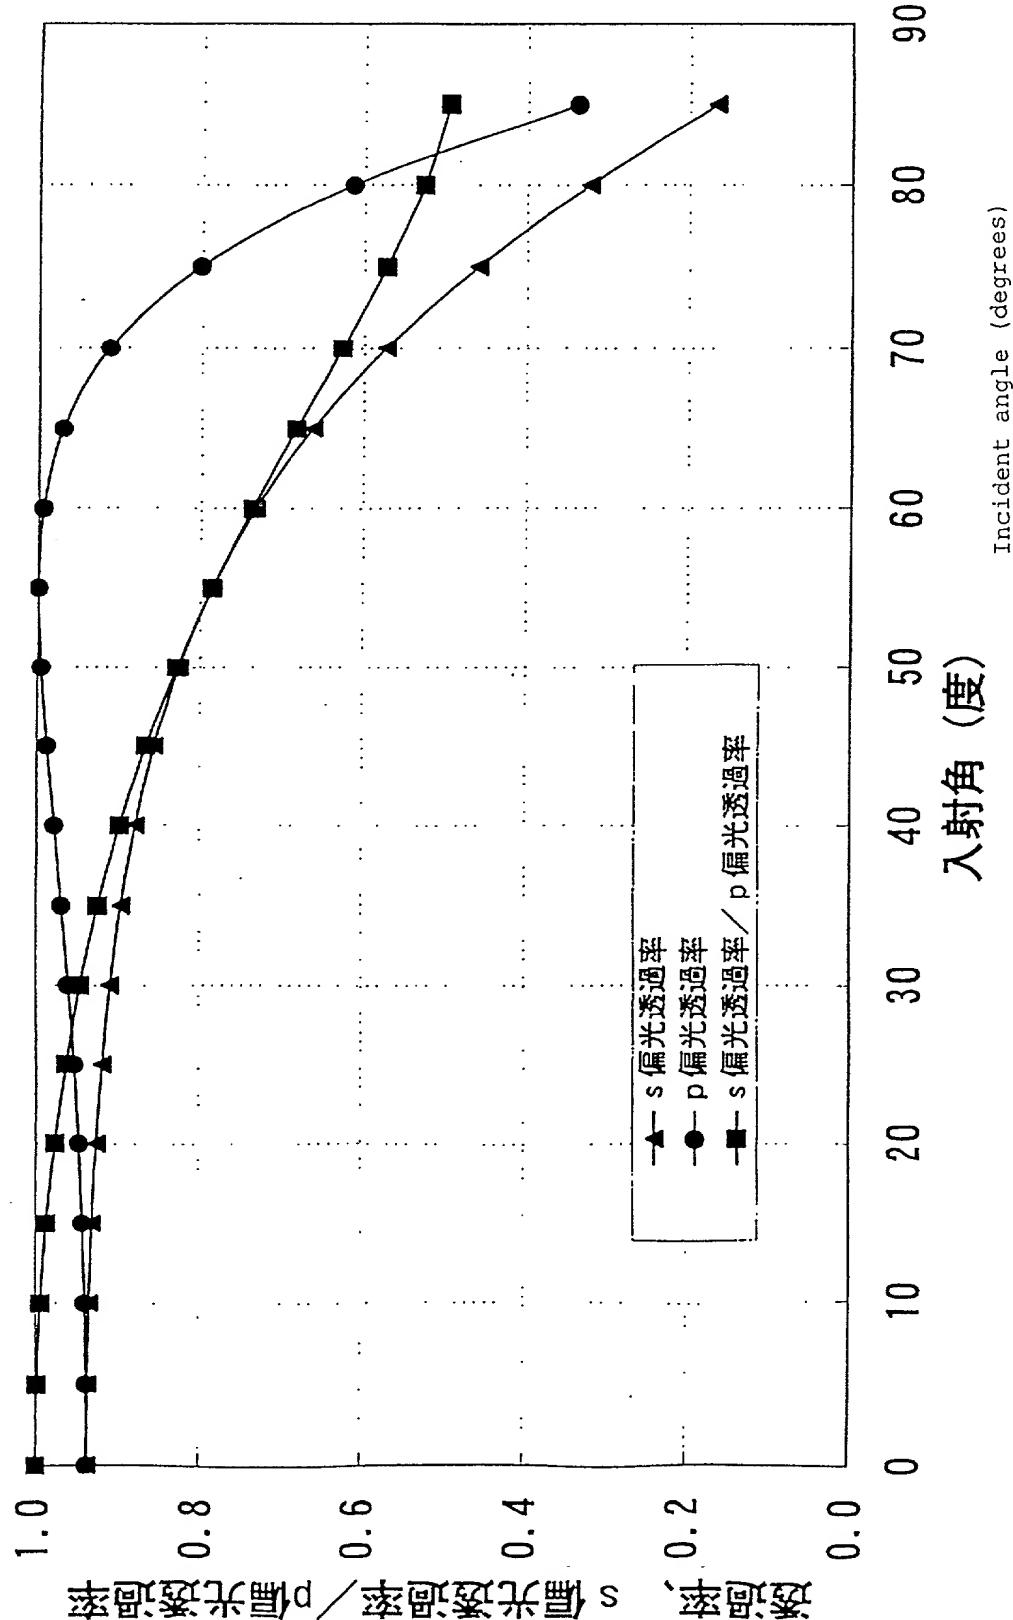

s-polarized light component transmittance/p-polarized light component transmittance

component transmittance

透過率、s偏光透過率/p偏光透過率 transmittance/p-polarized light component transmittance

透過率、s-polarized light component transmittance transmittance, s-polarized light component

[図9] Fig. 9

s-polarized light component transmittance

p-polarized light component transmittance

s-polarized light component transmittance/p-polarized light component transmittance

component transmittance
